Fredrik Wendt

MOTIVATION

As architect, developer, teacher or mentor, support and lift teams and individuals to their next level, with continuous delivery of business value.

GENERAL OVERVIEW

Customer feedback on Fredrik's work:

> «Fredrik is driving both technically and development method/process. He keeps himself updated and introduces technologies in areas we've found to be important to us. He shares experiences and insights to others in a splendid way . [...] Fredrik has shown breadth and drive in several projects where the boundaries and goals where unclear.»

> «Fredrik is focused, lojal, cares for details and ambitious. He's well though of among colleagues and is found easy to collaborate with. He's been a great asset and a driving force in all projects where he's been involved.»

Fredrik thrives in environments with openness, diversity and a general high level of engagement to delivering business value. Fredrik often ends up being in the middle, draws out the core questions in tricky situations and solutions, makes sure that the group and work is completed on time, but is in no way an autocrat. Instead, he strives for self-organization all over, but is quick to support and step in when said self-organization fails to pick-up the ball.

COMPETENCES

Fredrik's biggest assets are: his technical background and breadth which has given him strong analysis and systems thinking capabilities; an ability to focus on the business value to be found in deliveries and reduce problems and scope to manageable levels; listen, analyze and lead co-operations.

Fredrik lives to share what he knows and create a learning environment,

Fredrik Wendt

which is reflected in him engaging, participating and organizing a range of conferences and user groups. This theme is repeatedly included in clients' feedback, where they express appreciation of Fredrik's "learning and sharing" vibe being introduced to their offices and projects.

The roles Fredrik takes on is often one of many facetts, due to his technical breadth, enabling him to help out on many levels and not just with writing code. His understanding of agile software development, quick and strong analytical skills and ways of inspiring individuals into cooperation also contributes to this fact.

Community Engagements

Track Advisor, Software Craftsmanship, Technical Track, Agile 2015

Organizer, conference Brewing Agile

Program committe, conference Scandinavian Developer Conference

Program committe, conference Software Passion Summit

Program committe, conference FSCONS

Co-organizer, Scrum Beers Göteborg

Organizer, JDojo@Gbg – a coding dojo for Java programmers

SUBSET OF COURSES AND WORKSHOPS

Fredrik spends about half of his time on regular projects, and the rest giving classes, workshops and coaching teams.

Scrum.org courses

Scaling Professional Scrum – introduces the Nexus and teaches how to scale your software development effort beyond two Scrum Teams.

Professional Scrum Developer – targets the people who will build and deliver high-quality product at least once per Sprint.

Professional Scrum Master – gold standard Scrum Master course.

Professional Scrum Foundations – teaches the foundations of Scrum regardless of previous role in the organization.

Chalmers Professional Education

Technical DevOps – a full day of getting hands dirty with examples on how to shorten and strengthen the feedback loops within the technical parts of IT (dev and ops).

Software Craftsmanship – a series of five half day training sessions where modern software development practices are taught.

Growing Agility

Hands-on Continuous Delivery – half-day course where participants go from 0 to full operating cd pipelines with blue/green deployment setup in Amazon's cloud.

Dockerclass.com – a one-day, hands-on introduction to Docker.
